I was able to look at the pdf of the remediation report submitted on behalf of Respondent and it described **1500 yd3** so if we have to report that way then I'd use this number. But yes good idea to confirm with John if it should be reported that way versus pounds since I would think he'd prefer pounds.

Thanks,

Sooo sorry....I just saw Susan and since the PCBs were entrained in soil, I will need a yds³ number. For now I'll use 927688-lbs x 1yd³/2100-lbs = 442-yds³. Let me know if you have a different figure.

"Environmental benefits that accrue from cleanup actions are to be reported in ICIS in terms of the volume of contaminated media addressed by the action (referred to as VCMA)"

I copied John to see if there is a way to keep this as lbs, but I don't think there is.

The company gave us the \$1 million figure at a settlement conference.

It looks like it can go either way...lbs or yds³. I prefer the metric it hits in lbs, so no more info is needed. The \$1M is kind of a round number...is that yours or the company? Thanks.

Lydia – can you switch the 927688-lbs to Removal and Restoration? Thanks.

	Statute	Section	Category	Complying Action	Units	Destination
0	TSCA	6-PCBs	Removal and Restoration	Removal of Released Pollutants (includes oil	Pounds	Land
7	TSCA	6-PCBs	Removal and Restoration	Removal of Released Pollutants (includes oil	Cubic Yards	Land

Yes, it would fit removal and restoration based on that description. I am not in the office and don't have the file with me if you need this reported in cubic yards. Please confirm if that's what's needed then I will have to get back to you on Monday.

Thanks,

Could this be counted under Removal and Restoration?

The Removal of Released Pollutants complying action type applies where... PCBs...that have been released into the environment are removed for proper disposal as part of a remediation action. For reporting to ICIS it is necessary to determine the cubic yards of solid wastes and liquid wastes remediated in the cleanup.

Reduction of Ongoing Releases | Prevention of Future Releases | Work Practi

Total Cost: \$1,000,000.00

Type
Units
Media

Pollutant	Amount	National Priority	Regional Priority	OECA Core Pgm
POLYCHLORINATED BIPHENYLS (PCBS)	927688			Yes

Case Summary

Respondent disposed of PCB remediation waste from the Site at an unauthorized location (Veterans Field). Respondent also improperly stored PCB remediation waste, improperly disposed of PCB containers, failed to manifest PCB waste, and improperly identified the out of service date and generator on manifests for shipment of PCB waste. Veterans Field is being remediated, the containers had some decontamination prior to

shipment, and improperly stored waste, unmanifested waste and waste shipped with incorrect manifest information were properly disposed. The final penalty assessed is \$87,500.
